January 13, 2010

The Honorable E. Benjamin Nelson  
United States Senate  
720 Hart Senate Office Building  
Washington, DC 20510-2706

Dear Senator Nelson,

As an elected official and invested citizen in the future of the healthcare system in Northeast Nebraska, I am writing to express my support for Faith Regional Health Services' (FRHS) pursuit of federal appropriations for Fiscal Year 2010.

FRHS is in the middle of a \$10m electronic health record implementation and it would like to extend the benefits of this system to its rural partners in Northeast Nebraska. The counties I represent are a part of the area that would be affected by this venture and therefore I understand the need for these services to be extended to those communities as well. FRHS has shown tremendous leadership in expanding access to and enhancing the quality of care in our region, and this most recent effort is an extension of previous investments by FRHS in education, technology and clinical outreach. I believe that this project demonstrates a considerable need, a commitment by Faith Regional to meet that need, and an innovative approach to sharing available cutting-edge electronic medical technology with rural communities unable to access funding for these systems on their own.

As you know, Nebraska's large geographic mass along with its highly decentralized population creates major challenges for healthcare providers, including lower economies of scale and higher costs, physician and nursing shortages, and considerable additional effort expended to increase access for the rural populations. Healthcare providers in Northeast Nebraska have moved forward boldly on their missions in spite of these challenges, but our rural providers are especially in need of assistance to increase access and enhance quality. FRHS is in an ideal position to extend its technological capabilities to the rural hospitals and clinics due to its centralized location.

FRHS's efforts will provide our rural hospitals and clinics access to the most advanced medical imaging technology; they will also give our clinicians immediate access to medical history, test results, and tele-assessments. Currently, much of this is done with outdated technology at a much higher cost and over significant distances and lengths of time.

As you know, congressional funds are available to help offset the costs of such an undertaking. We in Northeast Nebraska are excited about the pursuit of these funds, and about what they could do for our healthcare system in Northeast Nebraska. The current endeavor to network rural healthcare clinics and hospitals to Faith Regional's new EMR system is a partnership that can only strengthen and enhance rural health care in Nebraska. We sincerely appreciate your support and are sure you will consider this a cause very worthy of federal funding. Thank you for your consideration and we look forward to your efforts on our behalf.

Sincerely,

A handwritten signature in blue ink that reads "Arnie Stuthman". The signature is written in a cursive, flowing style.

Senator Arnie Stuthman
